VOLUME CONTENTS

Number 1

M. Meniconi and D. M. Barry	1	Stepped dose effects on total dose damage to UMC6116 CMOS SRAM devices
J. M. Nahman	7	Approximate steady-state solutions for Markov systems based upon the transition-rate matrix deviation concept
D. S. Chang and L. C. Tang	17	Graphical analysis for Birnbaum–Saunders distribution
V. Benda, P. Špůr and B. Kojecký	23	Improving of large-area GTO homogeneity by electron irradiation
M. A. Styblinski	31	Generalized formulation of yield, variability, minimax and Taguchi circuit optimization problems
S. S. Elias, N. A. Mokhles and E. M. El-Sayed	39	Consecutive k-out-of-n:F system with sequential failures and a single repair
L. V. Utkin	53	Redundancy optimization by fuzzy reliability and cost of system components
V. S. Rana	61	Application of stochastic analysis technique in various disciplines
V. S. Rana	75	Stochastic analysis of computer based communication network systems
V. S. Rana	93	Reliability modelling for some computer systems
V. N. Rayapati and B. Kaminska	107	A dynamic reconfiguration scheme for mega bit Static Random Access Memories
V. V. Vinod and S. Ghose	115	Neural network optimization for redundancy allocation
K. K. Sharma and H. Krishna	125	On the estimation of sample size and censoring time in life testing experiments
T. V. Torchinskaya, T. G. Berdinskikh and O. D. Smijan	135	The causes of emitting-power instability in GaP:N LED
U. Singh, S. K. Upadhyay and R. Singh	141	Bayes estimators of exponential parameters utilizing a guessed guarantee with specified confidence
S. M. Verma and A. A. Chari	147	Availability and frequency measures of a non-identical two component system in the presence of common cause shock failures
W. K. Chung	153	Reliability and availability analysis of warm standby systems in the presence of chance with multiple critical errors
K. Misra and V. Misra	157	A procedure for solving general integer programming problems
		Technical Notes
L. R. Goel, S. Z. Mumtaz and S. Agrawal	165	Analysis of an on-surface transit system with correlated failures and repairs
M. C. Rander, S. Kumar and A. Kumar	171	Cost analysis of a two dissimilar cold standby system with preventive maintenance and replacement of standby
C. Hanzhong and L. Dongkui	175	A new algorithm for computing the reliability of complex networks by the cut method
K. K. Sharma and H. Krishna	179	Tolerance limits for the reliability of a k-out-of-m system
R. Gupta and A. Chaudhary	183	Analysis of reliability bounds for series, parallel and k-out-of-n system configuration

D. S. Chang — 187 A note on constructing the confidence bounds of the failure rate for the inverse Gaussian distribution

191 Book Reviews

Computer Methods for Circuit Analysis and Design

Reliability Engineering Handbook. Volumes 1 and 2

Digital Integrated Circuit Testing from a Quality Perspective

Number 2

T. T. Yuliasto, J. H. Nevin and H. T. Henderson — 197 Accelerated hot electron effects in DRAMs

S. M. Gupta — 201 Interrelationship between queueing models with balking and reneging *and* machine repair problem with warm spares

M. M. Siddiqui and M. Çağlar — 211 Residual lifetime distribution and its applications

S. U. M. Rao — 229 Reliability physics of electronic devices through materia' characterization and environmental stress testing techniques

L. C. Tang and D. S. Chang — 247 Reliability bounds and tolerance limits of two inverse Gaussian models

D. S. Chang — 261 Critical time of the lognormal distribution

M. K. F. Lai — 267 Polygon-to-chain reductions work for networks with imperfect vertices

D. Davani — 275 Parametric what-if analysis in MTTF: a single-run Monte-Carlo-based approach

R. N. Chakraborty, E. Yaprak and L. Anneberg — 283 Reliability enhancement by the reversal of token for a basic token ring in the case of a single component failure

K. Harada and T. Hidaka — 289 Probability analysis of a 2-out-of-*n* : F system with common cause failure, multiple failure and dependent failure

K. A. Mehdi and J. M. Kontoleon — 297 Design and analysis of a fault-tolerant reconfigurable random access memory chip

Y. Deng and B. Tang — 317 Comparing of system reliabilities of repairable coherent systems in a changing environment

N. R. Chaganty and R. Mukkamala — 323 Modeling and analysis of standby redundant computing systems

Y. Baek, H.-K. Lee and K. Ryu — 335 A new hardware-based fault-tolerant clock synchronization scheme for real-time multiprocessor systems

S. K. Upadhyay, R. Agrawal and U. Singh — 351 Bayes prediction results for the inverse Gaussian distribution utilizing guess values of parameters

W. Shao-ming, H. Ren and W. De-jun — 357 Reliability analysis of a repairable system without being repaired "as good as new"

K. J. Han, J.-M. Yoon, J. A. Kim and K. W. Lee — 361 Quality assessment criteria in C++ classes

Technical Notes

S. Kaushik and I. P. Singh — 369 Reliability analysis of the naphtha fuel oil system in a thermal power plant

R. K. Tuteja and S. C. Malik — 373 A system with pre-inspection and two types of repairman

K. K. Sharma and R. K. Bhutani — 379 Analysis of posterior availability distributions of series and parallel systems

L. R. Goel, P. K. Tyagi and R. Gupta 383 Analysis of a standby system with dependent repair time and slow switching device

387 Calendar of International Conferences, Symposia, Lectures and Meetings of Interest

Number 3

N. Singh 391 Forecasting time-dependent failure rates of systems operating in series and/or in parallel

N. Singh 405 Time series analyses of the estimated reliability of systems composed of components operating in series and/or in parallel

V. N. Bhat 423 Sharp bounds for the mean time to failure (MTTF) using partial moments

B. S. Dhillon and O. C. Anude 429 Common-cause failure analysis of a k-out-of-n:G system with repairable units

A. M. Abouammoh and I. S. Qamber 443 Development of statistical theory in reliability engineering: a survey

I. S. Qamber and S. Q. Fakhro 463 Comparison of three-state probabilities under steady-state and transient conditions using both Laplace transforms and flow-graph methods, when applied to four TVA models

J. M. Nahman 475 Enumeration of minimal paths of modified networks

J. Shen and M. J. Zuo 485 A necessary condition for optimal consecutive-k-out-of-n:G system design

W. K. Chim and K. Y. Chong 495 Building-in reliability for silver die attached light emitting diodes

K. P. Soman and K. B. Misra 509 Bayesian sequential estimation of two parameters of a Weibull distribution

K. C. Madan 521 An $M/G/1$ queueing system with additional optional service and no waiting capacity

N. Jack and J. S. Dagpunar 529 An optimal imperfect maintenance policy over a warranty period

D. K. J. Lin and F. M. Guess 535 System life data analysis with dependent partial knowledge on the exact cause of system failure

A. M. El Messiry, Kh. M. El Said and M. A. Gaafar 545 Availability study of ETRR-1 primary cooling system

A. I. Timoshkin 555 A technique of realization for one class of two-testable k-valued logic elements

Technical Notes

B. Singh 559 Enumeration of node cutsets for an s-t network

V. S. Rana, R. K. Agnihotri and V. Kumar 563 Mathematical analysis of a transitional computer communication system

T. S. Uma Maheswari, A. Rekha and A. C. N. Raghavachar 569 Reliability of single stress under n-strengths of life distribution

573 Book Reviews

The Reliability, Availability and Productiveness of Systems

Process and Device Modelling for Microelectronics

577 Calendar of International Conferences, Symposia, Lectures and Meetings of Interest

581 Publications, Notices, Calls for Papers, etc.

Number 4

A. V. Ferris-Prabhu	587	Effect of design considerations on productivity at wafer level
N. Kaio, T. Dohi and S. Osaki	599	Inspection policy with failure due to inspection
I. A. Ryabinin	603	A suggestion of a new measure of system components importance by means of a Boolean difference
S. F. Yoon	615	Observation of degradation relaxation in 1.3 μm GaInAsP laser diodes
J. C. Chan, Shien-Tai Pan and D. F. Wong	627	On the study of generic cyclic redundancy code
D. Wang and T. Inagaki	641	Optimization of human interface configurations and safety control policies for alarm subsystems
J. P. Sawyer and S. S. Rao	653	Fault tree analysis of fuzzy mechanical systems
I. Qamber and S. Q. Fakhro	669	Comparison between state probabilities and availabilities of four-state and five-state models using Laplace transform and matrix multiplication methods
M. Maček, Al. V. Kordesch and R. Osredkar	689	Numerical analysis of a SWEAT structure with an improved one dimensional nonlinear model
W. K. Chim, D. S. H. Chan and J. C. H. Phang	703	Investigation of some aspects of the liquid crystal optical voltage contrast technique for integrated circuit physical analysis
N. Valisena	711	The use of MIL-HDBK-217 with the SCC EEE components
J. Cao	721	Reliability analysis of $M/G/1$ queueing system with repairable service station of reliability series structure
S. K. Bhattacharya and N. K. Singh	727	Reliability estimation for the PFM
L. R. Goel and S. Z. Mumtaz	731	Analysis of a two server–two unit cold standby system with correlated failures and repairs
A. Saini and A. Kumar	735	Cost analysis of a two-unit standby system under the influence of earthquakes
S. Anand and M. Chidambaram	741	Optimal redundancy allocation of a PWR cooling loop using a multi-stage Monte Carlo method
		Technical Notes
S. K. Singh and A. K. Mishra	747	Profit evaluation of a two unit cold standby redundant system with two operating modes
S. K. Singh and R. B. Singh	751	On the effect of random operation and preparation time for operation in a two unit cold standby system
S. Kaushik and I. P. Singh	757	Reliability analysis of the feed water system in a thermal power plant
K. K. Sharma and R. K. Bhutani	761	Bayesian reliability analysis of a series system

Number 5

C. M. Krishna	765	Timing analysis of expedient voting and runahead
G. Becker, L. Camarinopoulos and W. Ohlmeyer	771	Discontinuities in homogeneous Markov processes and their use in modelling technical systems under inspection
R. Calabria and G. Pulcini	789	An engineering approach to Bayes estimation for the Weibull distribution
B. S. Dhillon and Nianfu Yang	803	Human reliability: a literature survey and review
S. Jain and R. K. Jain	811	An application of SPRT for detecting change point in a reliability growth model

Chu-Hua Kuei and C. N. Madu	815	Tool spare management for a single manufacturing cell
Chu-Hua Kuei and C. N. Madu	831	Sequential experimentation and multilevel Taguchi designs in simulation metamodeling of a maintenance float problem
Chinho Lin, C. N. Madu and Chu-Hua Kuei	845	Experimental design and regression analysis in simulation: an automated flowline case study
L. V. Utkin	863	Knowledge based fuzzy reliability assessment
A. H. Rawicz	875	Stress induced corrosion of wire micro-joints in microelectronics—a quantitative model
D. P. Milovanović and V. B. Litovski	883	Fault models of CMOS circuits
J. H. Huang, Y. H. Jiang and Y. Y. Qian	897	The influence of dwell time on reliability of SMT solder joints under thermal cycling
M. S. Moustafa	905	Convexity results for some approximations of $M^{[X]}/G/1$ and $M^{[X]}/D/1$ queueing systems
S. S. Ang, Y. J. Shi, W. D. Brown and L. West	909	The effects of gamma irradiation on low-pressure chemical-vapor-deposited silicon dioxide metal-oxide–silicon structures
E. J. Vanderperre	921	A cold standby system with multiple switch-over devices attended by a monitor
B. Singh and S. K. Ghosh	925	Network reliability evaluation by decomposition
K. P. Soman and K. B. Misra	929	A simple procedure of computing variance sensitivity coefficients of top events in a fault tree
		Technical Notes
R. Gupta and R. Goel	935	The truncated normal life time model
E. V. Prasad and A. K. Sarje	939	Bandwidth availability of multiprocessor systems
G. Eranna and A. B. Ramrekha	943	Electrical instability of sintered Ta films on (vacuum evaporated) polysilicon structures
G. Arulmozhi and R. Nadarajan	947	Markovian parallel system with the repairman's vacation
P. K. Bhatia	951	On a characterization of Kerridge inaccuracy

Number 6

V. Obac Roda and T. T. Y. Lin	955	The distributed voting strategy for fault diagnosis and reconfiguration of linear processor arrays
G. Thangamani	969	Bounding algorithms for two-terminal network reliability
S. Patra and R. B. Misra	983	A new method for reliability evaluation of composite power systems
M. S. Choi and C.-H. Jun	999	Terminal-pair reliability of network system using flow augmenting path search algorithm
P. Kacprzak, J. Bremont, M. Lamotte and P. Charpentier	1013	Optimization of data compression methods
W. K. Chung	1021	Reliability and availability analysis of warm standby systems with repair and multiple critical errors
M. Zhao and M. Xie	1027	EM algorithms for estimating software reliability based on masked data
A. E. El-Hennawy and T. S. Al-Harbi	1039	A new technique of cancelation of the MOSFET leakage currents and parasitic capacitances
T. Smy, S. S. Winterton, S. K. Dew and M. J. Brett	1047	Simulation and analysis of electromigration failure distributions

L. Cui and A. G. Hawkes	1057	Availability of a series system with warm spares
V. S. Kouikoglou	1071	Single sampling plans for attributes satisfying an arbitrary set of constraints—a graphical approach
K. K. Aggarwal and S. Kumar	1079	Delay related reliability: a new performance index for computer communication network dynamics
J. S. Dagpunar and N. Jack	1089	Preventative maintenance strategy for equipment under warranty
S.-W. Kiu	1095	The up and down distributions of a Wheatstone bridge
T. M. Young and F. M. Guess	1107	Reliability processes and corporate structures
S. K. Ashour and M. A. M. H. El-Wakeel	1121	Bayesian prediction for the range with a Burr distribution and a random sample size
G. Shankar and V. Sahani	1127	The study of a maintenance float model with gamma failure and two repair centres
		Technical Notes
R. Gupta and A. Chaudhary	1133	Profit analysis of a two-unit man–machine system with random appearance and disappearance of the operator
A. A. Chari	1137	Optimal redundancy of *K*-out-of-*n*:*G* system with two kinds of CCF

Number 7

D. Kaur and D. Wedding II	1141	Reliability of Hamming Code transmission versus error probability on message bits
C. N. Madu, P. Lyew and J. Russel	1147	On the use of simulation metamodeling in solving systems availability problems
Who Kee Chung	1161	Stochastic analysis of a warm standby system with repair in the presence of chance of multiple critical errors
J. M. Nahman	1167	Exact enumeration of minimal paths of partitioned networks
J. Y. T. Ang and N. A. J. Hastings	1177	Model accuracy and goodness of fit for the Weibull distribution with suspended items
K. B. Kulasekera	1185	Approximate MLE's of the parameters of a discrete Weibull distribution with type I censored data
V. S. Sarma Yadavalli	1189	General measures of a two-unit system
K. L. Pey, W. K. Chim, J. C. H. Phang and D. S. H. Chan	1193	Optoelectronic material analysis and device failure analysis using SEM cathodoluminescence
P. Yuanidis, M. A. Styblinski, D. R. Smith and C. Singh	1203	Reliability modeling of flexible manufacturing systems
M. M. A. Ananda	1221	Reliability modeling of engineered barrier systems for nuclear waste: a conditional approach
B. S. Dhillon	1227	Optimizing income of repairable reliability systems
S. K. Ashour, M. E. Abdelhafez and S. Abdelaziz	1233	Bayesian and non-Bayesian estimation for the Pareto parameters using quasi-likelihood function
G. S. Mokaddis, S. W. Labib and KH. M. El Said	1239	Two models for two-dissimilar-unit standby redundant system with three types of repair facilities and perfect or imperfect switch
P. Chandrasekhar and R. Natarajan	1249	Confidence limits for steady state availability of a two unit standby system
G. Härtler	1253	Best linear unbiased estimation for the Weibull process

Shi Jiawei, Jin Ensun, Ma Jing, Dai Yisong and Zhang Xinfa	1261	An improved approach and experimental results of a low-frequency noise measurement technique used for reliability estimation of diode lasers
R. Osredkar	1265	Spin-on-glass material curing and etching
		Technical Notes
V. Sridharan	1269	A note on the statistical characteristics of a two-unit system
A. Agarwal, R. P. Gupta and W. S. Khokle	1273	Reliability of high temperature superconductor metal contacts
L. R. Goel and S. Z. Mumtaz	1279	An inspection policy for unrevealed failures in a two-unit cold standby system subject to correlated failures and repairs
	1283	Calendar of International Conferences, Symposia, Lectures and Meetings of interest
	1287	Publications, Notices, Calls for Papers, etc.

Number 8

H. Schäbe	1291	Nonparametric estimation of mean time to failure with unknown stochastic censoring
R. Mittal, B. N. Jain and R. K. Patney	1301	Finding nonfaulty subtrees in faulty binary tree architectures
L. Råde	1311	A consecutive k-out-of-n reliability system in random environment
A. Csenki	1319	On the interval reliability of systems modelled by finite semi-Markov processes
Who Kee Chung	1337	Reliability and availability analysis of a k-out-of-N:G redundant system with repair in the presence of chance of multiple critical errors
Who Kee Chung	1343	Reliability analysis of a cold standby system with multiple critical errors
R. K. Agnihotri, S. Chand and V. B. Mudgal	1349	Two unit redundant system with adjustable failure rate, critical human error (CHE) and inspection
N. Singh	1355	Recursive estimation of time-dependent reliability
R. K. Bhan and P. C. Mathur	1361	An alternate and simpler method for finding the field-dependent defect density of SiO_2 films using MOS capacitor devices
P. Chandrasekhar, R. Natarajan and H. S. Sujatha	1365	Confidence limits for steady state availability of systems
T. I. Sultan	1369	Optimum design of sampling plans in electronic industry
S. Jain and R. K. Jain	1375	A sequential test to control up and down times when their distributions are gamma
S. A. Siddiqui, M. Subharwal, S. Gupta and Balkrishan	1377	Finite range survival model
R. Gupta and A. Chaudhary	1381	A two-unit system with allowed down time and random check of standby
R. Gupta and A. Chaudhary	1387	Profit analysis of a system with two-units having guarantee periods and delayed operation of standby
R. Gupta, A. Chaudhary and R. Goel	1391	Cost–benefit analysis of a two-unit standby system with a proviso of repair-machine failure
M. A. Aziz, M. A. Sobhan and M. A. Samad	1395	Fast enumeration of every path in a reliability graph using subgraphs

P. K. Kapur, S. Agarwala, S. Younes and A. K. Sinha 1397 On a general imperfect debugging software reliability growth model

Shi Jiawei, Jin Ensun, Ma Jing and Gao Dingsan 1405 *b* and its temperature dependence are the important criteria of the reliability of semiconductor lasers

1409 World abstracts on microelectronics and reliability

Number 9

M. S. Finkelstein 1431 Once more on measures of importance of system components

M. S. Finkelstein 1441 Probabilistic approach to some problems of system safety

A. Islam and N. Ahmad 1459 Optimal design of accelerated life tests for the Weibull distribution under periodic inspection and type I censoring

G. K. Agrafiotis and M. Z. Tsoukalas 1469 Reliability analysis and optimization applications of a two-unit standby redundant system with spare units

Myron Xu, Jianming Tao and R. Mukkamala 1477 Representing monitored systems: a critical process in data collection

Kun-Jen Chung 1485 An approximation optimal inspection policy

A. M. Rushdi and A. M. Al-Qasimi 1489 Efficient computation of the P.M.F. and the C.D.F. of the generalized binomial distribution

H. Schäbe 1501 Constructing lifetime distributions with bathtub shaped failure rate from DFR distributions

M. Yamashiro 1509 The median for a trapezoidal fuzzy number

G. Shankar and V. Sahani 1513 The study of a maintenance float model with Burr failure distribution

M. Pandey, V. P. Singh and C. P. L. Srivastava 1519 A Bayesian estimation of reliability model using the linex loss function

S. K. Singh and A. K. Mishra 1525 On the expected revenue of a production system subject to operator condition

Zhiyu Tian, Shiyuan Yang and Shibai Tong 1529 An approximate method for computing performance-related reliability of gracefully degrading systems

Li Dong-Kui and Chi Hang-Zhong 1537 A new algorithm for reliability evaluation of three-state device complex networks: minimal cut–minimal path method

Technical Notes

V. Singh Rana 1541 Stochastic behaviour of various specific computer reliability models

R. L. Garg and P. Singh 1549 A queueing system with stepwise randomly available additional space

Letter to the Editor

F. Sezgin 1557 On a method for comparison of pseudo-random number generators

Number 10

J. L. Nolander and D. L. Dietrich 1565 Attribute data reliability decay models

A. A. Ismaeel 1597 Stuck fault test generation for dynamic CMOS

R. N. Kulkarni 1615 Modelling common cause failures under data uncertainty of the system unavailability

D. Wang and T. Inagaki 1623 Time-dependent optimality of an alarm subsystem

Kuo-Hsiung Wang 1635 Profit analysis of the machine repair problem with cold standbys and two modes of failure

T. L. Landers, K. Martin and J. R. English 1643 Decision modeling for thermal stress screening of commercial electronics

D. Kececioglu and Feng-Bin Sun 1657 Mixed-Weibull parameter estimation for burn-in data using the Bayesian approach

S. K. Singh 1681 On the effect of weather condition in a two unit cold standby system

S. K. Bhattacharya and N. K. Singh 1685 Bayesian reliability analysis for the MED

Kun-Jen Chung 1689 Optimal repair-cost limit for a consumer following expiry of a warranty

APPLIED SUPERCONDUCTIVITY

Editor-in-Chief: **Roger B. Poeppel**, *Argonne National Laboratory, USA*

(00101)
1994: Volume 2 (12 issues) Associated Personal price: **£75.00 (US$116.00)**
Subscription price: **£393.00 (US$605.00)**
ISSN 0964-1807

Audience: Materials Scientists, Physicists, Electronic and Electrical Engineers.

AIMS AND SCOPE
The aim of this new journal is to provide an international forum for the exchange of ideas concerning the large and small scale application of superconductivity. The focus of the journal is on any process, device, equipment, component, system, machine or structure which incorporates a superconducting element or which in some way takes advantage of or relies on the unique electrical or magnetic properties of superconductors to achieve a useful function. Examples include analog devices and SQUIDs, which are generally produced from thin superconducting films; RF cavities, which can be made from thick films and coatings; magnets, motors, generators and energy storage devices which may require long lengths of wire, tape, or multi-filament cable. Articles describing unique processing technologies aimed at achieving necessary performance characteristics are also appropriate. More specifically, the journal will contain articles on actual systems which embody various applications. These systems might include particle accelerators, magnetic levitation systems, electromagnetic launchers, fusion magnets, magnetic separation and research magnets, storage devices, imaging magnets and the facilities needed to support or augment these systems e.g. controls or cryogenics.

A Selection of Papers
R. PINTO *et al.* (India), Power and temperature dependence of Q factor of a double sided thin film $YBa_2Cu_3O_{7-\delta}$ microstrip resonator.

Announcing New and Newly Acquired Journals

Engineering

Control Engineering Practice

1995: Volume 3 (12 issues)

Publishes papers which illustrate the direct application of control theory and its supporting tools in all possible areas of automation. The journal is centred in engineering - especially mechanical, electrical and electronic, aerospace and chemical engineering, but also includes social effects, cultural aspects, project planning and system design and economic and management decisions.

Engineering Failure Analysis

1995: Volume 2 (4 issues)

Publishes original, high quality research papers, communications, and occasional review articles describing the analysis of engineering failures and related studies.
It provides essential reference material and critical feedback into design process thereby contributing to the prevention of engineering failures in the future.

Chemistry

Bioorganic & Medicinal Chemistry

A Tetrahedron Publication

1995: Volume 3 (12 issues)

Provides an international forum for the publication of full original research papers and critical reviews on molecular interactions in key biological targets such as receptors, channels, enzymes, nucleotides, lipids and saccharides. The aim of the journal is to promote a better understanding at the molecular level of life processes, and living organisms, as well as the interaction of chemical agents with these.

Physics

Studies in History and Philosophy of Modern Physics

Studies in History and Philosophy of Science, Part B

1995: Vol. 26B (3 issues)

SHPMP covers developments in physics from the mid nineteenth century to the present. The kind of theoretical physics which has come to dominate the exact sciences in the twentieth century. The journal is unrivalled in addressing this area in which much of the original and creative work in history and philosophy of science is currently being carried out. The editors particularly encourage articles of interest to scientists as well as specialists in history and philosophy.

PERGAMON

An imprint of Elsevier Science

Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford, OX5 1GB, UK
Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA

Social & Behavioural Sciences

European Management Journal

1995: Volume 13 (4 issues)

Publishes leading-edge research from academics and senior industrialists throughout Europe and the United States enabling practitioners and management trainers to broaden their knowledge of the new operational environment.

International Business Review

1995: Volume 4 (4 issues)

This journal provides a forum for academics and professionals to share the latest developments and advances in knowledge and practice of international business. It aims to foster the exchange of ideas on a range of important international subjects and provide stimulus for research and the further development of international perspectives.

International Transactions in Operational Research

1995: Volume 2 (4 issues)

The primary purpose of this journal is to advance the understanding and practice of operational research on an international basis. The scope of the journal will include problems of an international nature (eg. fisheries management, environmental, global competitiveness).

Location Science

1995: Volume 3 (4 issues)

The primary focus of this journal is on research directed to extending and applying the theory and modeling of location decisions. The journal will also publish papers which address the underlying processes related to locational decisions, the determination of parameters associated with location problems, and issues of implementation.

Transportation Research Part C: Emerging Technologies

1995: Volume 3 (6 issues)

This journal is concerned with the impacts of new technology (including IVHS) on transportation system performance characteristics.

Environmental Science & Technology

Spill Science and Technology Bulletin

Sister Journal of *Marine Pollution Bulletin*

1995: Volume 2 (4 issues)

A new international, peer-reviewed journal on oil and chemical spill science and technology, focussing on the effects and control of discharges of oil, oil products and other hazardous substances. Both land and water spill issues will be addressed, and papers linking science and technology with policy and management matters will also be considered appropriate.

Free sample copies of these journals are/or will be available on publication, from your nearest Elsevier Science office
